INTRODUCTION

Storexy.com is a portal for business owners on a budget. The portal will help them set up a private, fully functional online store with complete ecommerce functionality, keeping business open 24 hours a day, 365 days a year.

Why StoreXY?

Storexy offers a complete content management system that gives the store owner full administrative access to make any change on his/ her web store through its very flexible portal. A few noted benefits are listed below:

- It takes less than 3 minutes to set up.
- No technical or design experience required.
- No maintenance burden or hosting costs.
- Secure data in the hands of well grounded professionals.
- 24/7 customer service to put you through.
- Responsive Design (i.e it is accessible from any device - tabs, pc or mobile).
- Unlimited upload limit (No quota to hard drive space consumed).
- unlimited number of products (No quota to number of items in store).
- Generate promo and discount codes.
- Create social links for store-front.
- Broadcast messaging to registered customers (Useful for store news and updates).
- Declare delivery parameters (including COD, Home delivery and Park delivery options).
- Change store theme.
- Manage inventory (item categories & attributes, extra images).
- Automatic stock update and alerts.
- Upload homepage sliders/banners and logo.
- Set store information (FAQ, Delivery info, Terms & conditions, 'About us' page, Contact Page).
- Store front displays store owner's phone and BBM Pin on every page of the store.
- Email alerts (for both store owners and their customers).
- Easy subscription process in form of bank transfer, subscription code or online payment.

SETTING UP YOUR STORE

Setting up your store is easy. Your store will appear as a subdirectory on our host (i.e www.storexy.com/yourStoreName). We suggest that you keep your store links short and simple for it to remain easily accessible and memorable to your customers.

An example is www.storexy.com/kemiBeads (where the store link is '**kemiBeads**').

Managing Multiple Stores

A user can create more than one store under an account. This is a very useful feature for individuals who earn a living from managing the online presence of various stores and this can be achieved without any interference. This means Mr. X can actually sell products for Store A, Store B and Store C while all three stores pay Mr. X an agreed fee for helping them sell their products.

Your Admin Menu

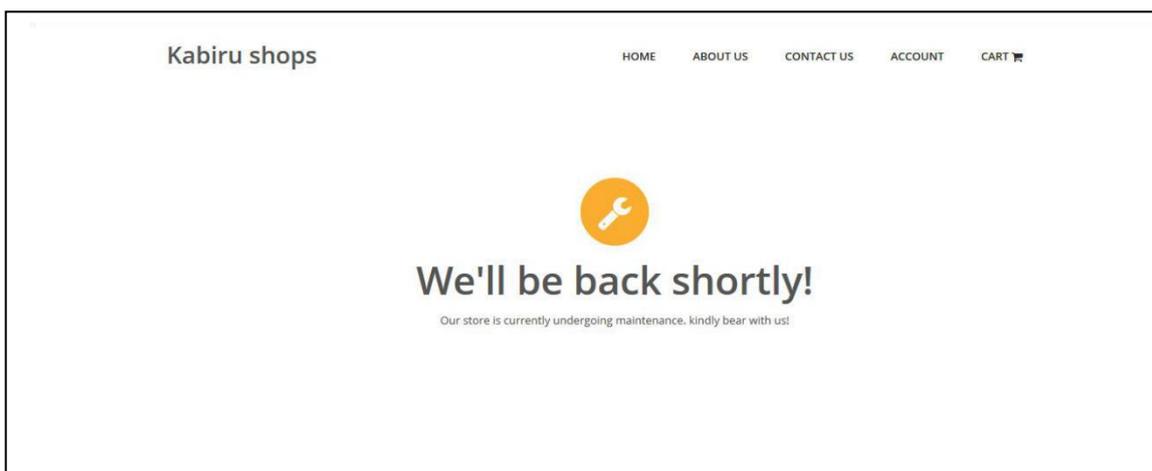

- **MY STORES** - This showcases all stores listed under your account.
- **ADD NEW STORE** - This is a link leading to a form to add an extra store to your account.
- **LOG OUT**- A link to log out your current account.
- **HELP** - This menu links you to (a) download product manual, (b)Storexy contact page.
- **DASHBOARD** - The dashboard is an overall glance of all the events in your store. It alerts the store owner about pending orders, subscription status, items running out of stock, tips, recent orders, most viewed items, and most sold items.
- **SUBSCRIBE** - This menu leads the store owner to make necessary payments to keep the store running.
- **MODULES** - The modules menu envelopes a number of other links that serve as the administrator / site owner's tools. These 'tools' are described below:
 1. **Add New Item** (To add a new item / product to your store).
 2. **Stock Inventory** (A list of all your products).
 3. **Homepage banner** (Upload or change your store homepage banner. The homepage banner is a landscape-sized image that covers the full width of the screen, usually meant to convey a message or used as some form of advertisement on the store).
 4. **Store Logo** (Upload a logo that represents your business).
 5. **Item Categories** (Create categories to group your products and make them found easily in your store).
 6. **Delivery Settings** - This is where you declare your delivery settings. Upon checkout, whatever you set here will be displayed to your customer at the front-end. You may choose to accept cash on delivery in some particular locations and keep it disabled in others. You can also leave a delivery note to all buyers.

7. **Promo Coupons** - Generate coupon codes to offer discount to your registered customers.
 8. **Store Information** - All your store details such as delivery information, FAQ, terms and conditions, what your store is about, phone numbers, social links etc can be stored and modified here.
 9. **Store theme** - Switch your store theme to a color that matches your brand.
 10. **Customers**- This menu links you to your list of registered customers. You can also send a broadcast message to all your customers here.
 11. **Orders** - This menu links you to all orders made on your store. This is where you take the orders and update their process status in order to keep the buyer informed.
 12. **Portfolio** - This menu links you to the option of creating an online portfolio for your services.
- **ACCOUNT** - The Account menu links you to either reset your password or log out of your admin portal.

I HAVE CREATED MY STORE. WHAT NEXT?

After setting up your store, it immediately goes live (i.e it becomes accessible to any visitor that knows your store link). Delivery parameters are automatically generated on your behalf for all states but you may edit delivery costs for each state or else it will be assumed to be free by your buyers. (Navigate to MODULES >DELIVERY SETTINGS).

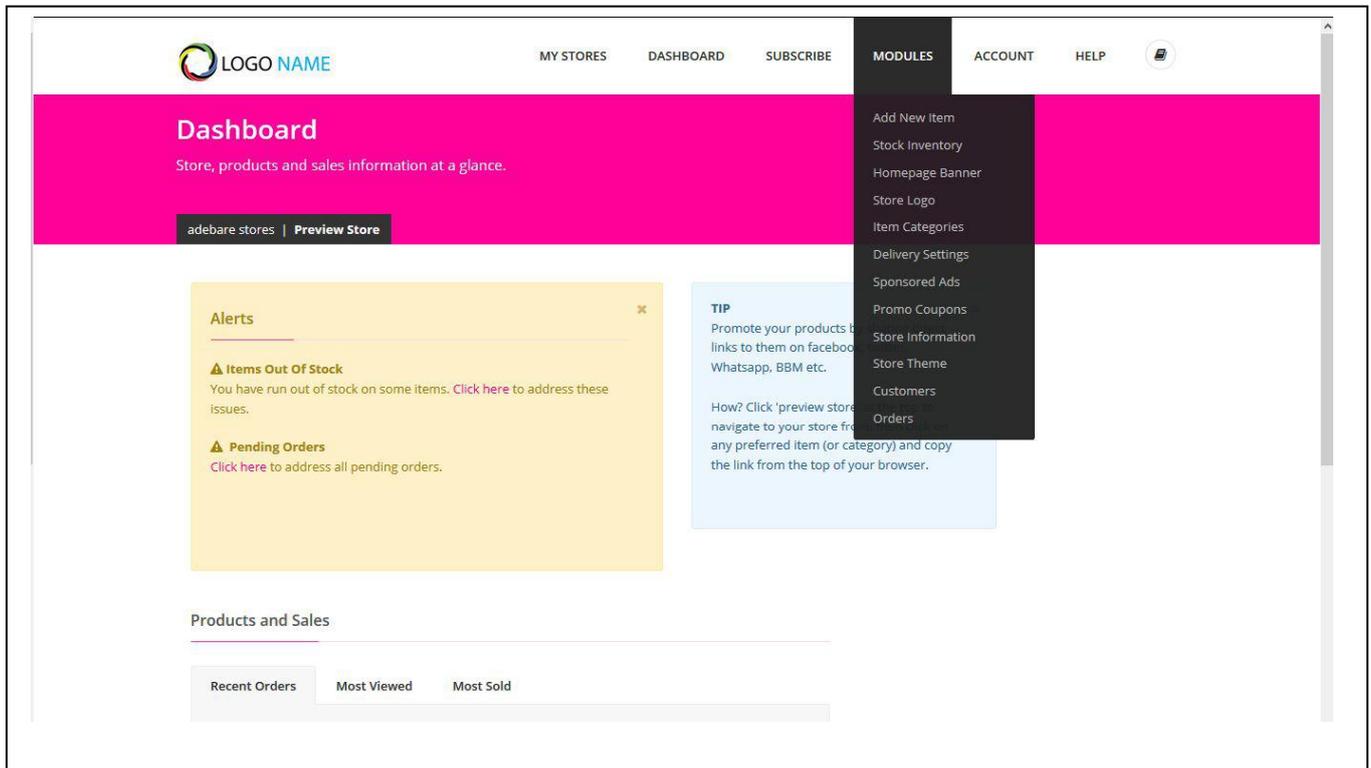

If your store settings are incomplete, , your store-front (i.e the part visible to visitors/customers) will remain in maintenance mode until you set at least one parameter and update your store information. Keep in mind that visitors don't have access to your admin portal. They can't see your admin content and they can only access your store-front.

(Store front with no delivery parameter or missing necessary store information will be automatically switched to maintenance mode)

Step 1 - Select A Store To Manage

Your first step will be to click on <Manage Store> to navigate to your admin dashboard. Here you will find alerts notifying you about your subscription status as well as a request to submit details for your store information and delivery parameters.

The screenshot shows a web dashboard for store management. At the top left is a logo with the text "LOGO NAME". The navigation bar includes "MY STORES", "DASHBOARD", "SUBSCRIBE", "MODULES", "ACCOUNT", and "HELP". A dark grey dropdown menu is open under "MODULES", listing: "Add New Item", "Stock Inventory", "Homepage Banner", "Store Logo", "Item Categories", "Delivery Settings", "Sponsored Ads", "Promo Coupons", "Store Information", "Store Theme", "Customers", and "Orders". The main content area has a pink header with "Dashboard" and the subtitle "Store, products and sales information at a glance." Below this is a button for "adebare stores | Preview Store". A yellow "Alerts" box contains two items: "Items Out Of Stock" and "Pending Orders", each with a "Click here" link. A blue "TIP" box provides instructions on how to use the "preview store" link. At the bottom, there is a "Products and Sales" section with tabs for "Recent Orders", "Most Viewed", and "Most Sold".

(Sample dashboard with notifications)

Step 2 - Update Store Information

Your store information is very crucial as it reflects your details to all your customers and site visitors alike. Since customers may likely contact you for enquiries, the store information section helps you to deal with all aspects in this area. This section also stores your bank information which is displayed to your buyers during purchase.

Fill up the fields and click 'save'.

Store / Company Information (For the 'About Us' Page)*
This is a sample store created to guide new online store owners and showcase the robust features of this amazing solution.
Create your online store on storexy.com now

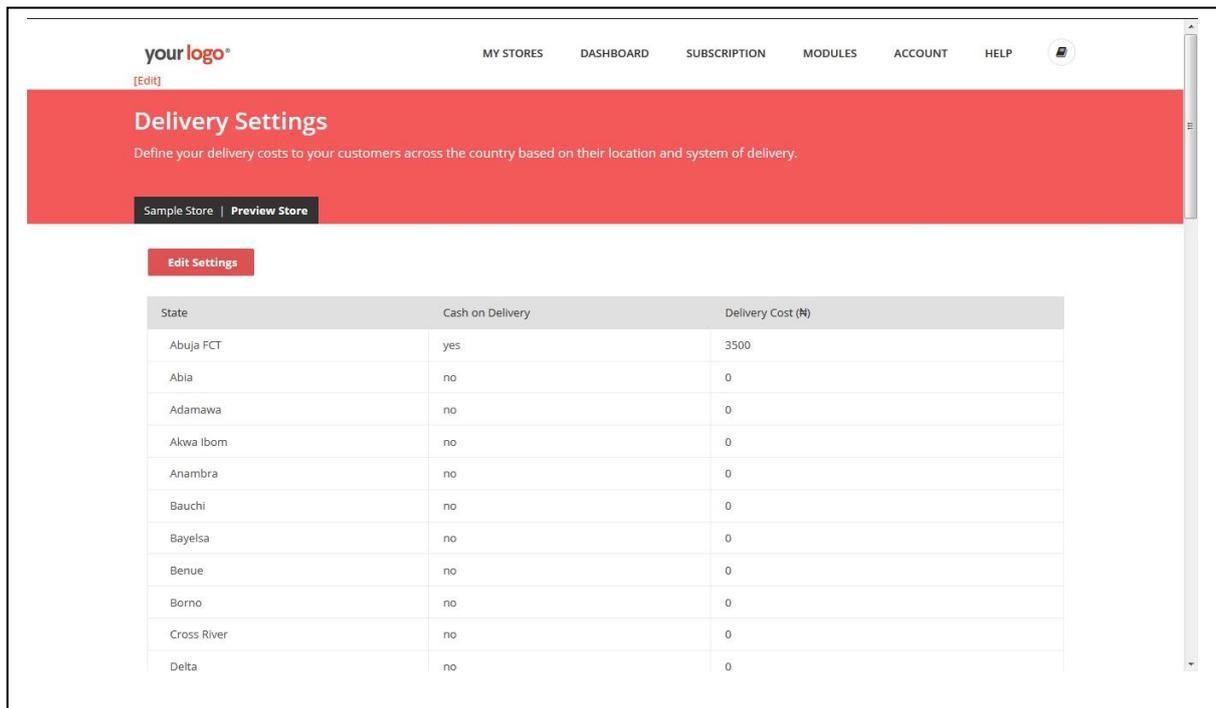

Bank Account / Payment Information *
Fill this portion with your account details to enable bank transfer/cash deposit payment option on your store, otherwise leave it blank.

(Store information page)

Step 3 - Add Delivery Parameters

This module saves you a lot of time spent on explaining delivery charges based on location to customers. Navigate to **MODULES > DELIVERY SETTINGS**, click on 'edit settings' button to edit the delivery information then fill the fields with how much you wish to charge for both park or home delivery in each state. You can also choose which states to accept cash on delivery, which has been disabled by default.

If the delivery pattern does not fully work for you, you can leave the delivery cost at zero and insert your own additional information in the field below the form. This information will be displayed to buyers during checkout and also available on your storefront's delivery information page. This area can also convey messages for delivery timeframe etc.

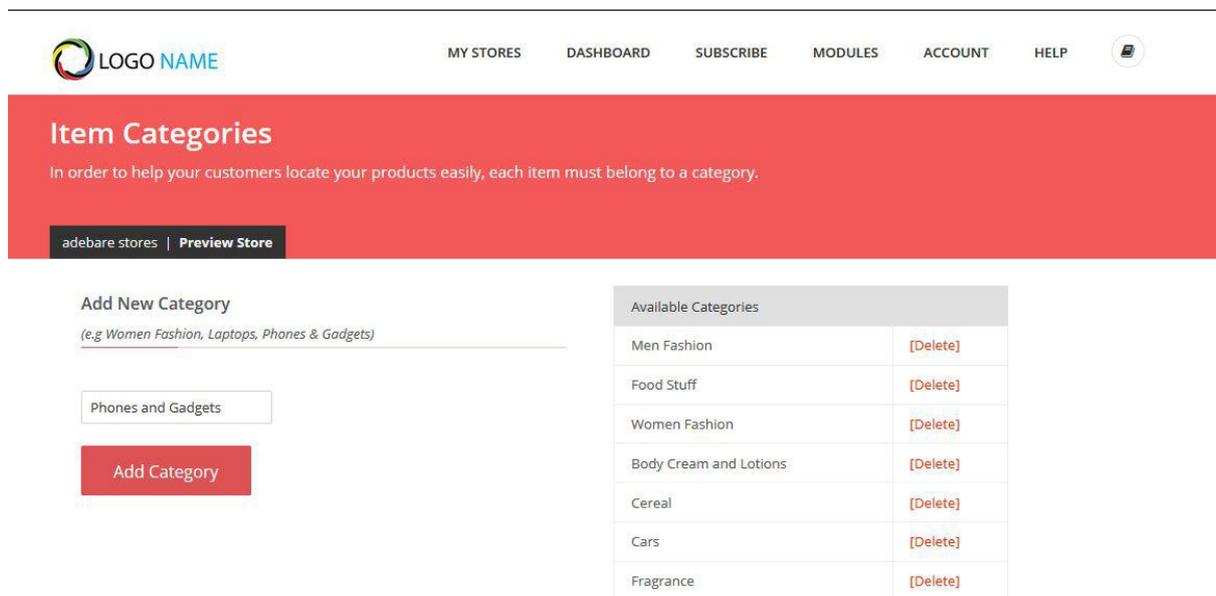

State	Cash on Delivery	Delivery Cost (₦)
Abuja FCT	yes	3500
Abia	no	0
Adamawa	no	0
Akwa Ibom	no	0
Anambra	no	0
Bauchi	no	0
Bayelsa	no	0
Benue	no	0
Borno	no	0
Cross River	no	0
Delta	no	0

Step 4 - Add Product Categories

Each of your products must belong to a category. This helps your products to be properly indexed and your customers can easily find them.

You can navigate to this page through **MODULES > ITEM CATEGORIES**

LOGO NAME MY STORES DASHBOARD SUBSCRIBE MODULES ACCOUNT HELP

Item Categories

In order to help your customers locate your products easily, each item must belong to a category.

adebare stores | [Preview Store](#)

Add New Category

(e.g Women Fashion, Laptops, Phones & Gadgets)

Step 5 - Add New Items

Now that you have your categories in place, you can proceed by uploading your products. Add your product name and other details of the product, then select the item's image from your system or device. Make use of clear images (preferably with white background).

Make sure the size is as low as possible within its best quality for your site to load faster. Keep in mind that the higher the size (in kilobytes) of your image, the slower your page loads.

MY STORES DASHBOARD SUBSCRIBE MODULES ACCOUNT HELP 

Add New Item

Stock up your inventory with new items within minutes.

[adebare stores](#) | [Preview Store](#)

Item Name: *

Category: * -- Select Category -- 

Price: * Quantity: *

Photo (200kb max): * No file selected.

Describe the item briefly:

When adding new items, try as much as possible to be descriptive with your item names. Avoid using short, vague names or titles. Descriptive titles will give your audience a better understanding of the product at a glance. This will also be an advantage when visitors stumble upon your products online.

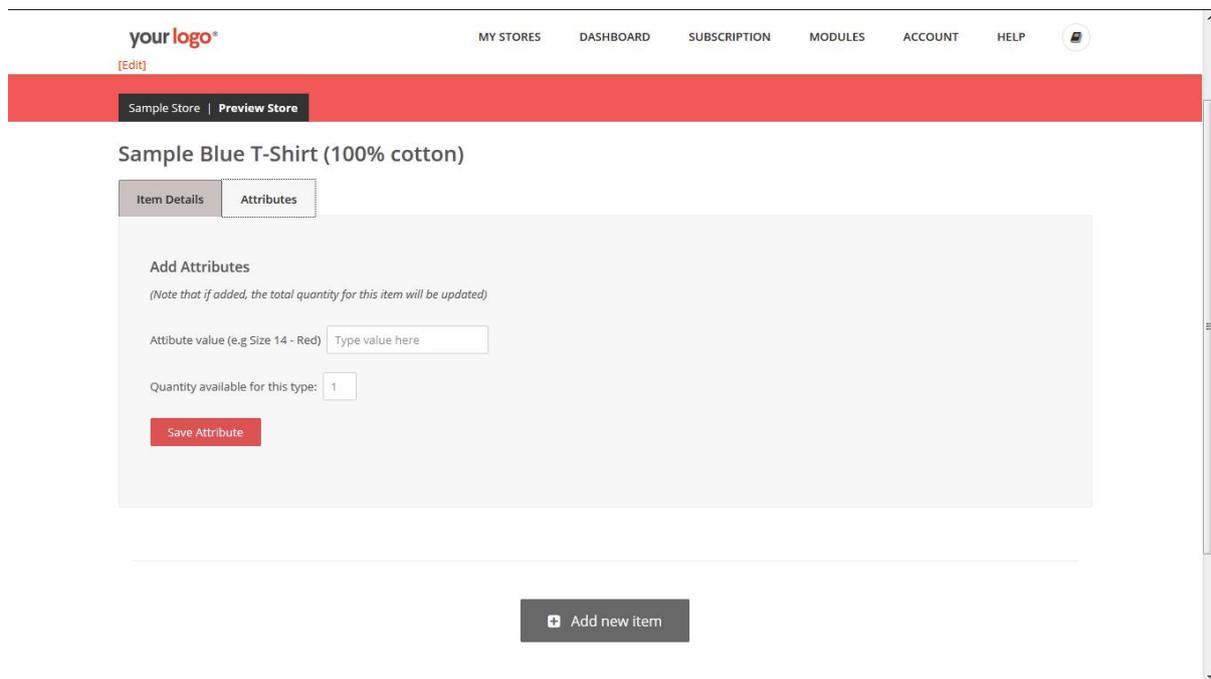

Your webstore has been optimized for SEO and a well written title and description will do your store a great favour.

For example, if you sell hair extensions (weavon), avoid using a product name like "weavon for sale". Instead, use a more descriptive name like "Jaycee Deep Wave 100% Human Hair".

ADDING PRODUCT ATTRIBUTES

Sometimes you may wish to add a more descriptive feature to distinguish your products in situations where one item has more than one possible feature or attribute (e.g color, size, volume etc). Adding an attribute enables the buyer to pick a choice out of your given list. Therefore, after saving your "Remy Brazilian Hair", simply add an attribute from the preview page. So your attribute for "Remy Brazilian Hair" can be "Size 16 - Black". Select the quantity available for that attribute and click on 'Save Attribute' to attach your new attribute to your product.

On this same page, you can add more images of that same product. Please keep the upload size limitations and impact of uploading 'heavier' images in mind.

PORTFOLIO

This module comes to use if you also offer services and you want a gallery to showcase your works / projects. This comes in handy for designers, makeup artists, architects and many other fields of work. Add new by going through **MODULES > PORTFOLIO**

The screenshot shows a web interface for updating a portfolio. At the top, there is a navigation bar with 'Your Logo' on the left and links for 'MY STORES', 'DASHBOARD', 'SUBSCRIBE', 'MODULES', 'ACCOUNT', and 'HELP' on the right. Below the navigation bar is a red header section with the title 'Update Portfolio' and the instruction 'Add previous jobs / projects you've done to your portfolio.' Underneath the header, there are two tabs: 'Nasad Stores' and 'Preview Store', with 'Preview Store' being the active tab. The main content area contains the following form fields:

- Name or Title of Project:** A text input field.
- Project Description:** A larger text area with the placeholder text 'How it was made, your client, tools used, duration etc...'. A small '.gif' icon is visible at the bottom right of the text area.
- Project Category:** A dropdown menu currently showing '-- Select Option --'.
- Web Link (Optional):** A text input field containing 'e.g http://www.project-link.com'.
- Feature Project On My Store Homepage:** A dropdown menu currently showing 'Yes'.
- Image Upload:** A label 'Upload an image from your pc / device (250kb max).', a 'Browse...' button, and the text 'No file selected.'

PROMO COUPONS

This module enables you to offer discounts to your customers. Your promo coupons can be in 3 forms:

1. Discount on all items:- This method offers a given percentage off the total cost of all items bought.
2. Discount based on purchase range:- This implies that the customer's cart must have a total cost up to the provided range before the discount code can be valid when applied.
3. Discount based on category:- This kind of discount is focused on the store owners' choice. The discount will be applied to only that given category if it exists in the buyer's cart.

Your promo codes will become invalid as soon as the declared expiry date has been reached.

Promotional Coupons
Create custom coupon codes to offer your shoppers a discount on whatever they're buying from your store.

RECEIVING AND ADDRESSING ORDERS

When customers place their orders, an email alert will be sent to you to notify you about a new order. Another mail is sent to the customer to acknowledge that you have received the order.

You can address orders by directly checking pending orders from your dashboard or notifications. After viewing the order, you may place a call to the customer to re-confirm the order and then update the progress by changing order status - which will automatically mail your buyer with the new status of the purchase.

The screenshot displays a web interface for order management. At the top, there is a navigation bar with a logo and menu items: MY STORES, DASHBOARD, SUBSCRIBE, MODULES, ACCOUNT, and HELP. The main content area shows an order with the status 'In Transit'. Below this, there is a 'Summary of costs' table for order 20150817102902, listing items like 'Hugo Boss Quality Men's Cologne' and 'Miss Branson Attachment with Kinky Twist Lace Tip'. To the right, there is an 'Update Order Status' section with a dropdown menu and a 'Save Update' button. Below the cost summary, there are sections for 'Delivery Details' (Name, Phone, City) and 'Payment Method' (Bank Transfer).

HOMEPAGE BANNERS AND STORE LOGO

Banners and logos give your business or store a much more professional outlook, thus making it easier for your customers to trust you. We strongly recommend you upload your banner and logo for your store to look much more welcoming to the eye of visitors.

The screenshot shows the 'Homepage Banners' configuration page. At the top, there is a navigation bar with 'LOGO NAME' and links for 'MY STORES', 'DASHBOARD', 'SUBSCRIBE', 'MODULES', 'ACCOUNT', and 'HELP'. The main heading is 'Homepage Banners' with a subtext: 'A good banner attracts your customers at first glance, giving your store a more professional look.' Below this, there is a 'Preview Store' button. The page explains that there are 2 slots for banners. A preview section shows 'banner 1' with a woman's image and 'WOMAN FASHION' text, and 'banner 2' which is currently empty with a question mark and 'No banner' text. At the bottom, there is an upload section with a file selection button and a note: 'Upload an image from your pc / device (500kb max). We strongly recommend a dimension of 1200 x 400 pixels.'

Here's what the store-front will look like after uploading a banner:

The screenshot shows the store front page. The navigation bar includes 'LOGO NAME', 'HOME', 'ABOUT US', 'CONTACT US', 'ACCOUNT', and a 'CART' icon with a '1' item count. The main banner area displays the uploaded image of a woman in a white lace top with the text 'WOMAN FASHION'. Below the banner, there is a 'Categories' section with buttons for 'Men Fashion', 'Food Stuff', 'Women Fashion', 'Body Cream and Lotions', 'Cereal', 'Cars', and 'Fragrance'. To the right is a 'Search Store' box with the placeholder text 'Type and hit enter..'. At the bottom, there is a row of four product thumbnails: a colorful logo, a handbag, another handbag, and a black kettle.

THE AFFILIATE PROGRAM

The affiliate program is not limited to store owners alone. The program pays you for encouraging people to create their online stores on Storexy. This program does not require any fees and is quite easy to set up.

A very interesting feature of this program is, not only does a subscription fetch you 10%, but that same subscriber will keep fetching you 10% every time their subscription is renewed.

After setting up your affiliate account, an affiliate wallet is created for you. This is where all your discounts get saved until you have earned enough to transfer to your real bank account (at least N5,000).

As an affiliate, you can view subscribers with both expiring and expired accounts who signed up through your link in order to remind them to re-subscribe.
